Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The invention set forth in claim 6 is disclosed in documents 3 and 4, and therefore lacks novelty and does not involve an inventive step. Documents 3 and 4 indicate that a plurality of different types of solid catalyst components with different shapes are included, and after a removal step, the respective solid catalyst components are separated.

The invention set forth in claim 7 does not involve an inventive step in the light of document 3. Document 3 indicates that a screen is used when separating pills, which are cylindrical catalyst particles, into pills having a ratio of length to diameter (L/D) of one or more and pills having a ratio of less than one.

The invention set forth in claims 10 and 11 does not involve an inventive step in the light of documents 1 to 4. It would be easy for a person skilled in the art to apply the features set forth in documents 1 to 4 to known complex oxide catalysts.

The invention set forth in claims 3 to 5, 8 and 9 is not disclosed in documents 1 to 4, and would not be obvious to a person skilled in the art.
